

**REMARKS - General**

By the above amendment, Applicants have amended the title to emphasize the novelty of the invention.

Also applicants have rewritten all claims to define the invention more particularly and distinctly so as to overcome the technical rejections and define the invention patentably over the prior art.

**Comments:**

Applicant would argue that while in Hsu (US 6374496) and in Tseng the inventions may be able to operate as a scraper it would be difficult to do as the blade face is perpendicular to the handle making it difficult to use with an up and down motion that is used in scrapping where as in the Applicant's invention the blade face is parallel with the body of the device.

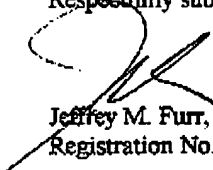

**Conclusion**

For all of the above reasons, applicant submits that the specification and claims are now in proper form, and that the claims all define patentably over prior art. Therefore the applicant submits that this application is now in condition for allowance, which action is respectfully solicited.

**Conditional Request For Constructive Assistance**

Applicant has amended the specification and claims of this application so that they are proper, definite, and define novel structure which is also unobvious. If, for any reason, this application is not believed to be in full condition for allowance, applicant respectfully requests the constructive assistance and suggestions of the Examiner pursuant to M.P.E.P § 707.03(d) and § 707.07(j) in order that the undersigned can place this application in allowable condition as soon as possible and without the need for further proceedings.

Respectfully submitted,

  
Jeffrey M. Furr, Esq.  
Registration No. 38,146

I hereby certify I have transmitted this paper by fax to the Patent and Trademark Office to 703-872-9306 on 2004, June 4.
